

AMONG THE EXCHANGES OF THE INLAND EMPIRE

Phone Project Assured.

Plans for the speedy construction of the Palouse irrigation project by the government at a cost of \$3,000,000 are better than ever. The project is to irrigate 100,000 acres of land in the Palouse country. The project is to be completed by the year 1910. The project is to be completed by the year 1910. The project is to be completed by the year 1910.

Idaho Artesian Water.

Mr. and Mrs. C. H. Gibson of this city are feeling very fortunate just now and have good cause to do so as they now have three flowing artesian wells on the desert land tract taken up by Mrs. Gibson, which is located on "Alkali," between Little and Big Willow creeks, about 35 miles from Payette. In the first well put down an inch of artesian water was struck at a depth of 101 feet, in the second four inches were struck at a depth of 39 feet and in the third 15 inches were struck at a depth of 73 feet. The casing of the third well is four inches above the surface of the ground and the water rises to a height of 12 inches above the casing. There is 80 acres in the tract of land and the striking of this artesian water for irrigating purposes will add greatly to its value.—Payette Independent.

Settlers at Condon.

A tent city has sprung up in the north end of town in the last few days. Many people are coming in and are looking for homesteads and business locations. If the present rate of settlement continues it will be only a short time until all the available land within a radius of 15 miles of this city will have been taken up.—Condon Times.
